PROJECTS

BloodWeb — *Real-time Blood Donation System*

a full-stack blood donation request platform built to facilitate emergency communication between blood donors and recipients. Designed with accessibility and urgency in mind, the system supports live notifications, request management, and secure role-based interactions. Used AI tools (e.g., ChatGPT) to accelerate backend implementation, while focusing on learning authentication, database integration, and deployment hands-on.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, CORS, HTML, CSS, JavaScript, Socket.io

Web Hosting : Frontend on Netlify, Backend on Render

 **GitHub:**

(<https://github.com/Sciber766/BloodWeb>) - Frontend Repo

(<https://github.com/Sciber766/BloodWeb-dBackend>) - Backend Repo

 **Live :** <https://bloodweb2.netlify.app>

Portfolio Website— *A static self-built portfolio site*

Responsive single-page portfolio showcasing projects, built with smooth animations and clean design.

Stack : HTML, Tailwind CSS, JavaScript, AOS

TECHNICAL SKILLS

Frontend : HTML, CSS, JavaScript, Tailwind.

Backend : Node.js, Express.js

Others : Java (Infosys Certified)

Database : MongoDB (used in a project)

Version Control & Deployment : Git, Github, Render, Netlify

Learning / Familiar with : Java, MySQL (in progress), C & C++ (used in academics)

Tools & Utilities : VS Code, Chrome DevTools, ChatGPT (assisted dev)

SOFT SKILLS

- Problem-solving mindset,
- Self-learning & initiative-taking,
- Time management,
- Communication

Certifications & Workshops

Java Foundation Certification - Infosys Springboard
